EDUCATION

Bachelor of Technology, Walchand Institute of Technology, Solapur
Computer Science and Engineering (9.8/10 SGPA)

2018 - 2022

SKILLS

Programming Languages	JavaScript, Python, C/C++
Frameworks and Packages	React, Redux, Redux-toolkit, Firebase, Jsonwebtoken, Express, Nodejs, Material UI
Databases	MongoDB, SQL Server, SQL, Oracle Apex
Developer Tools / Cloud	Vs Code, Postman, Git, Azure TFS, Azure DevOps, Swagger, Oracle Cloud Integration
Certifications	Oracle Cloud Infrastructure

EXPERIENCE

Senior Software Engineer
Persistent Systems

June 2024 - Present
Pune, India

- Used **React** to develop portal for Annual Increment planning and **express, Oracle integration** for back-end API which enabled real-time data sync from Oracle Fusion to databases like **Oracle Apex and MongoDB**.
- Implemented the front-end using **React** for Talent Identification application, used **redux-toolkit and react-redux** for the **state management** of the entire web app, **tailwind css** for UI enhancements developed the **asynchronous** api calls using **express, Oracle integration** and created **stored procedures** in **oracle apex**.
- Designed and developed the Training Management system completely from scratch using **React**, enabled **authentication** using **Azure SSO, express js** for the back-end API written over **MongoDB, Azure TFS** for code check-ins and scheduled deployments.

Software Engineer
Persistent Systems

June 2022 - June 2024
Pune, India

- Contributed in developing training management system, worked on the crucial **redux stores, slices** for **state management** and front-end using **React, Oracle Integration** for seamless data integration with **Sql server**.
- Developed email notifications using **express js and Oracle Integration cloud** for the training management system.
- Developed the integration of interview auto analysis using generative AI **rest apis** and **express js**, used **Jsonwebtoken** for client-server communication, triggered the feedback via email notifications using **oracle integration**.
- Worked on dashboards and charts using **React and material UI** for interview auto analysis portal.

PROJECTS

FoodZies - Built an online food ordering application using the swiggy's **live api**, used **redux-toolkit** for **state management**, implemented front-end by using **ReactJS**, used performance optimizing concepts like **lazy-loading**, **shimmer effects** compressed images.

Bloggy - Created an online blogging web app that could create, edit, view, update, delete, view blogs and many other things, used **react** for front-end and **express** for back-end

NetflixApp - Working on a netflix clone using **react** as front-end, **firebase** for the database and authentication, **tailwind css** for UI enhancement, **gpt** for search feature...etc

WebWeather - Made a responsive and mobile friendly UI using **react**, used Weather API for real-time updates, geolocation Api to view area wise updates

ACHIEVEMENTS

- Awarded Top Talent for my contribution towards the company's performance and deliverables.
- Bravo Team award for developing Talent Identification platform within strict timelines and customer success.
- Bravo Team award for contributing and getting placed 9th in the Global level hackathon.
